

Information Regarding Lack of Alternative Providers

Exhibit 2

Explanation of Map

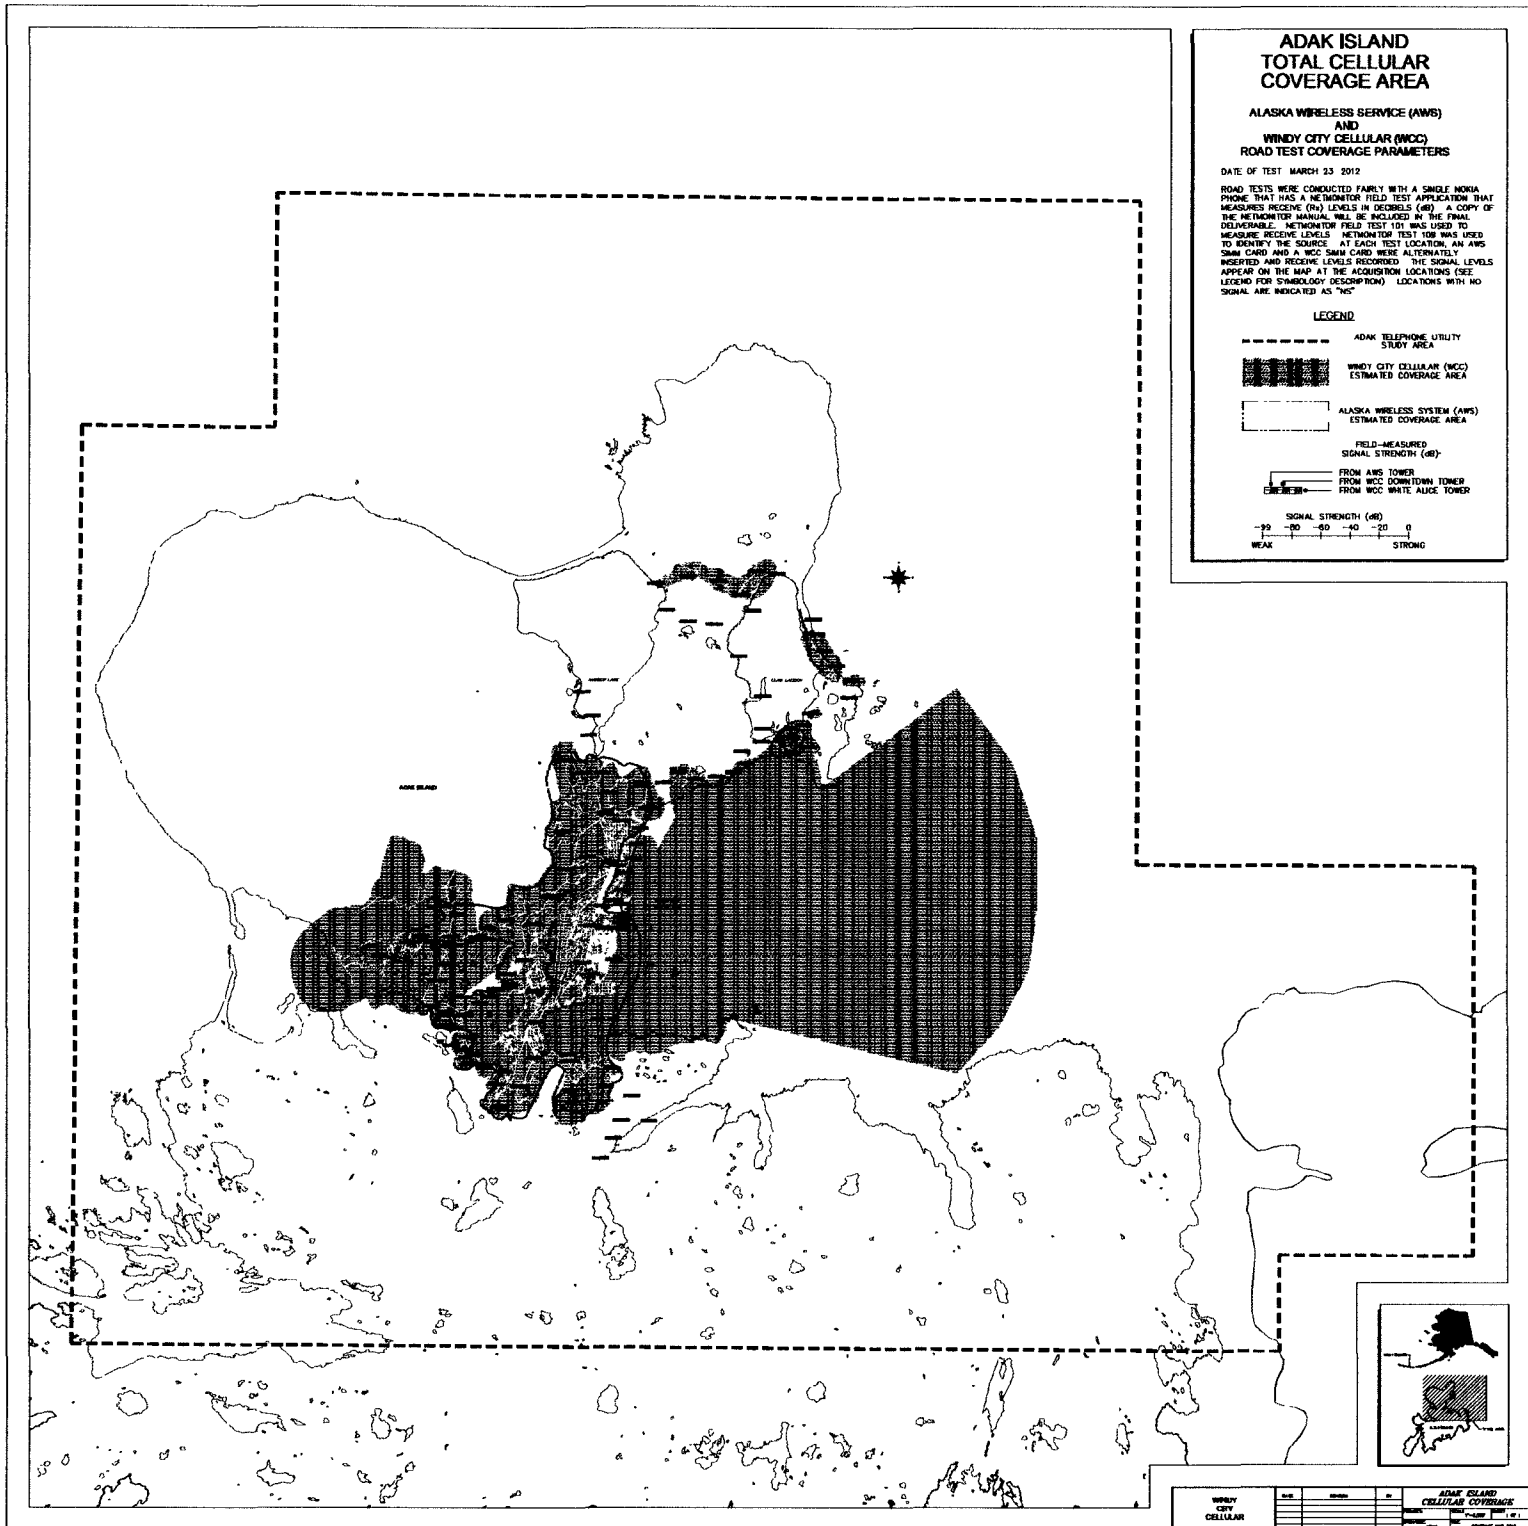

This Map shows the coverage area of the three carriers that provide service to the Adak area.

- The area inside the black hash marks represents the service area in which AEE provides wireline local exchange service.
- The green area represents the wireless service area of AEE's affiliate, Windy City Cellular, LLC.
- The area within the red line represents the Alaska Wireless coverage area for its wireless service.

Please Note:

AEE is the only provider of wireline local exchange service in the Adak area.

Without AEE, neither Windy City Cellular nor Alaska Wireless would be able to continue providing wireless services to any portion of the Adak area.

Explanation of Information

Part 32

AEE's normal process is to track spare equipment through inventory Account 1220 and place it into services once the work order is completed.

Part 36 Separation Categories

For unused equipment or facilities, the following categories are used. All facilities are placed in service.

Cable and Wire Facilities:

CAT 1.1 is allocated based on loops

CAT 1.3 is allocated by the Subscriber Plant Factor (SPF)

CAT 2.1 is directly assigned to the Interstate Private Line

CAT 2.2 is directly assigned to EAS

CAT 3.1 is allocated based on circuit miles

CAT 3.2 is allocated based on circuit miles

CAT 3.3 is allocated by the Conversation Minute Miles (CMM) Factor

CAT 4.1 is allocated by the Host/Rem MOUM Factor

Central Office Equipment

CAT 3 is allocated by the DEM Factor

CAT 4.11 WB is allocated based on Wideband Loops and Wideband Circuits

CAT 4.11 DSL is directly assigned to the Interstate Private Line

CAT 4.12 Exchange Trunk is directly assigned to EAS

CAT 4.13 Exchange Line follows the allocation of Cable /Wire Facilities Category 1.3

CAT 4.22 State Special is allocated based on IX Circuit Terms

CAT 4.23 Interstate Special is allocated based in IX Circuit Terms

CAT 4.23 Joint Use is allocated by the Conversation Minutes (CM) Factor

Make-Up of Corporate Operation Expenses

Exhibit 4

Explanation of Information

AEE owns, operates, and maintains local exchange telecommunications facilities in the Adak area to allow telecommunications between users subject to the terms and conditions specified in its tariff.

Adak Telephone Utility offers Low Income Assistance in the form of Expanded Link Up and Enhanced Lifeline services. AEE also offers Special Access Service over a dedicated channel between specified locations for communication purposes of its customer and or authorized users. Special access service specification shall be in accordance with FCC standards as reflected in NECA tariff, FCC#5, Chapter 7. Additionally, AEE offers the Schools and Library's Universal Service Discount to the only school and library in the Adak area. This service is offered through the Universal Service funding designated as a "special contract."

AEE offers Wireless Interconnection Service between wireline and wireless services. Without AEE, *there would be no local service, no long distance provided to the IXC, no Lifeline for low income subscribers, no special circuits to telemedicine, no schools and library program, no special circuit connecting broadband to offer ISP services, and no Windy City Cellular or Alaska Wireless cellular service throughout the entirety of the Adak area.*

This is not counting the many end users proving essential services such as 911, volcano observing, earthquake monitoring, Coast Guard operations, Navy operations, marine life monitoring by the Fish and Wildlife Department, boat monitoring by the Marine Exchange, operation of a vital fuel station, Adak City offices, the boat harbor, fish processing, the post office, EODT clean-up, military missile monitoring, and community development organizers.

(c) Conditions

- (1) Custom Calling Services require special facilities and will be provided only where such facilities are available.
- (2) Installation charges for connection of Custom Calling Services are as follows:
 - (i) If Custom Calling Service is requested with the initial order of exchange network access line service, no additional installation charges will apply.
 - (ii) If Custom Calling Service is requested after the initial exchange network access line service is installed, then the appropriate service connection charges will apply. This would include subsequent service order and Central Office line connection charges.
 - (iii) If special handling, including toll restriction service, is requested, a Billing Control Feature (BCF) charge will be assessed. The BCF charge is a pass-through charge from the interexchange carrier. The charge does not apply in situations where the restriction is issued to limit uncollectibles from customers who are past due on their accounts.

8.07 Low Income Assistance – Enhanced Lifeline and Enhanced Link Up Service

(a) Enhanced Lifeline Service

(1) Applicability

The rates and terms specified herein apply to all residential customers of the Company who apply for Residential Exchange Access Service and who meet the means test specified in section 7 of the tariff.

(2) Rates

Enhanced Lifeline Service is a reduction in the local service charges paid by qualifying low income customers. This reduction to the normal residential rates is as follows:

- a) Reduction of the tariffed primary interstate rate for End User Common Line charge (EUCL) or Subscriber Line Charge (SLC) as filed by the National Exchange Carriers Association (NECA) with the FCC
- b) Reduction of basic monthly service by \$3.50 from the Alaska Universal Service Fund.
- c) Reduction of charges for basic monthly residential service up to \$28.50 from the federal Lifeline support program except that it may not bring the basic local residential rate (including any mileage, zonal, or other non-discretionary charges associated with basic residential service) below \$1.00 per qualifying low-income subscriber.

(a) Lifeline Service (continued)

(2) Rates (continued)

These reductions apply to the Residential Exchange Access Service subscribed to by the customer. The Federal Lifeline reduction shall be used in part to waive the customer's federal end-user Subscriber Line Charge (SLC).

(b) Enhanced Link Up Service

(1) Applicability

The rates and terms specified herein apply to all residential customers of the Company who apply for Residential Exchange Access Service and who meet the means test specified in this section of the tariff.

(2) Rates

Enhanced Link Up Service consists of a 50% discount of the first \$60 up to a maximum of \$30 as well as an additional discount of up to 100% of the charges between \$60 and \$130, leading to a total maximum discount of \$100 applied to, new service connection charges as outlined in the rate schedules for Service Charges. The supported services under this section do not include the charges assessed for facilities or equipment that fall on the customer's side of the demarcation point, (i.e. customer premises equipment and inside wiring charges)

The customer may defer payment on up to \$200 of the above charges without interest for a period not to exceed one year. The deferred charges do not include any permissible security deposits required. Payments shall be equally paid over a twelve-month period. If any payments are delayed, interest shall accrue from that date forward.

8.18 Universal Service Discount for Eligible Schools and Libraries

(a) Applicability

For purposes of the universal service discount program, rural areas are defined in accordance with the Office of Management and Budget's Metropolitan Statistical Area designation of metropolitan and non-metropolitan counties, adjusted by the most currently available Goldsmith Modification, which identifies rural areas within large metropolitan counties.

The percent discount is based on the number of students eligible for the national school lunch program or a federally approved alternative mechanism. Each school may compute the discounts on an individual school basis or it may compute an average school discount among a group of schools or a school district.

A library's level of discount is based on the number of students eligible for the national school lunch program (or federally approved alternative mechanism) in the school district in which the library is located. Each library may compute the discounts on an individual branch library basis or it may compute an average discount among a group of libraries.

(b) Discount Matrix

Pursuant to the Telecommunications Act of 1996 (47 U.S.C. 254(h)(1)(B)) certain schools and libraries receive support under the definition of universal service. The discount matrix below is presented for calculating discounts to those qualifying entities.

Percentage of Students Eligible for National School Lunch Program	Urban Discount	Rural Discount
<1	20%	25%
1 - 19	40%	50%
20 - 34	50%	60%
35 - 49	60%	70%
50 - 74	80%	80%
75 - 100	90%	90%

Intrastate discounts shall be available only if the discounts are fully funded through the federal universal service program. Details regarding the federal program and qualification for federal funding are found at 47 C.F.R. Part 54.
